Ron Wilhelm, Stuart Walker, "Amy Legare"

Dan,

Reviewing work plans is beyond the scope of a NRRB consultation. The NRRB consultation process has for other sites included a consultation memo that is shared with the region and kept as an internal document. I requested reviews from the HQs reviewers on the SFS and several of the reviewers are NRRB members.

Doug, there may be some confusion. I am asking for NRRB/HQ comments on the PRP's recent work plans to implement the additional evaluations requested by the NRRB's draft comments on our "early consultation". These additional evaluations are what I'm calling the Supplemental SFS (SSFS). I previously transmitted these work plans to you and the HQ review team you designated in December.

I am not asking for comments about the early consultation itself. The Region has already gotten a commitment from the PRPs to do these additional analyses based on the draft NRRB comments from the early consultation, so getting a "final" consultation memo from Amy at this point is of limited use to the SSFS process.

Sincerely,
Daniel R. Gravatt, PG

Subject: Re: West Lake Landfill: Update requested on HQ/NRRB review of SSFS Work Plans

Charles' version cited earlier drafts of individual Board member's comments (rather than the last one posted on the internal site). The board never reached final consensus on any of the draft comments. Amy Legare is currently pulling together a "final" consultation memo that we believe should be used instead as the Board's consultation documentation.

Stuart, Dave, Ron, Charles,
Now that we're in the new year, I wanted to remind you that I still need your comments on these workplans discussed below, which I forwarded to you previously. I would like your comments by the end of January if at all possible. I have prodded the PRPs to provide the last two workplans, which I will forward to you as soon as I get them.

Thanks,

Stuart, Dave, Ron, Charles,
See email string below from Doug Ammon on HQ review of the West Lake SSFS work plans. We have four of them so far, attached below in case they have not already been provided to you. I anticipate two more and will forward them as they arrive from the PRP's contractor. I am also attaching EPA's letter to the PRPs requesting this work for the SSFS for your reference. Please advise when you believe you can complete your reviews and provide comments.

Sincerely,

Doug,

I was wondering if the HQ technical review team had been established so that Dan could send this information to them directly? My recollection is that Stuart Walker, Dave Bartenfelder, and Ron Wilhelm were going to be a part of that team. Let me know. Thanks!

Subject: West Lake Landfill: SSFS Partial Excavation Work Plan

Amy,

Here is the next workplan provided by the West Lake OU1 PRPs for the additional evaluations requested by the NRRB. Since these additional evaluations are being conducted solely to respond to the Board's comments, it is essential that the Board review these work plans to ensure that the proposed work will adequately address the Board's comments, and to ensure that this is the final set of additional evaluations to be conducted prior to drafting the ROD amendment.

Please have the Board review and comment on this work plan and the others I previously forwarded to you, and I will pass the Board's comments on to the PRPs so they can make any necessary changes. While the Region may provide its own comments to the PRPs on these work plans, the Region will not consider these work plans to be final until it receives the Board's comments (and the PRPs address those comments to the Board's satisfaction) or the Board informs the Region that the work plans are acceptable. As the PRPs provide the remaining work plans, I will forward them to you for the Board's review.

Sincerely,
Daniel R. Gravatt, PG
